Purpose

The purpose of the site is to supply services where the client can compare between the varies insurance products by price in Israel.

The Users are clients which interested in buying an apartment insurance, car insurance or making travel insurance. report show us findings which were done on the website "Wobi" which offers variety of insurances by several companies according to the customer needs.

The tests were made to evaluate the functionality and usability of the website across different browsers and devices.

The goal was to identify and report any bugs, errors, or inconsistencies in the website's layout, navigation, performance and information by the website.

Application Overview

"Wobi" is a digital insurance company that shows insurance offers by comparing prices and conditions between several insurance companies.

"Wobi" was created in 2010 and today is the oldest company that marketing several types of insurance dealing with apartment insurance, traveling insurance, mortgage insurance, car insurance and life & health insurance.

The site offers availability of 24/7 by operator's services where you can find almost any kind of insurance that you are looking for, and there is a lot of information in any kind of aspect related to each type of insurance.

The best thing about this site is that it gives an objective overview regarding comparison of several insurance companies where in the end the decision that being made is up to the client and his needs.

Testing Scope

This section will examine the functionality and modules in scope for example when I tested the site with a functional test by entering personal details in empty fields; receiving a message from the system that a representator will call back; and make sure the phone call was received after to the contact person that I gave.

In Scope:

- **Functional Testing**
 - After entering to “Client service” – שירות לקוחות, we got connected to a whatsapp chat with a Wobi representative and can start our own conversation with him/her.
 - Entering to the email tab will move us to several different emails of different subjects, we received replies from each mail that we sent.
 - Link to “Downloading files” – הורדת טפסים, is navigating me to choosing the subject and the insurance company that we want.
 - The system under “New Followers” will allow to enter only logical phone number and not numbers that can’t be a phone number in Israel, for example after the number -0- in the beginning, you can’t write again 0 or the number 1.
 - Broken links test through the website ahrefs.com/broken-link-checker showed me result of 31 broken links in “Wobi” site.

Boundary Value – Receiving an alert massage after typing wrong letters in empty fields such as identify wrong I.D. number in national identify form.

Testing the system by receiving correct and incorrect details.

For example, I texted wrong I.D. number and I got a message that

- Under ”New Followers” – מעצרפים חדשים, the system won’t continue to the next level unless I fill in all the blank fields .

- **UI Testing**

- Testing the website the way that the menu is working and explain correctly what it supposed to do, for example when it comes to car insurance, I had explanation that show me the differences between the insurance types and also showed me comparison in an easy way between the insurance companies.
- I must mention that in some places the resolution was too big and overlap on another text or I had to minimize the page resolution.
- Pressing on the logo icon from every page always takes me back to the homepage.
- The scrolling in every page on the website is a vertical scrolling and not horizontal.
- Every page has its own title.
- Through the page I am surfing, I have hyperlinks that transfer me to different a content on the website, depends on what I am pressing on.
- The content parts are not too long and explain to me exactly what they should.
- The pictures in the are fit in right size to it content and to the page.
- Testing the font type on the page and I found two types: "Ariel" and "Heebo"
- Checking the images size with opening DevTools and going to "Elements" and then "Network", where I can see under "Size" the images size which goes from 16.5kb to 116kb which shows us the value of small size (less than 100 kb to medium size – between 100kb to 500kb).

- **UX Testing**

- The website is easy to use and navigate, explained by photos, and very user-friendly.
- It Is also easy to use by mobile phone.
- If I click on one button, it leads me immediately to the next page that I needed, for example **דרושים** tab (job offer) lead me straight to several job offers.

- **Combability Testing**

- For every test that I did on the website, I checked it through 3 different browsers: Chrome, Firefox and Microsoft Edge.
- I also tested the website on my mobile phone and saw that the resolution fits the screen and were not being shown too big or small.
- I checked also the links of the website that offered services through WhatsApp, YouTube and Facebook.
- In a resolution of 100% sometimes not all the writing is in right order on the page and when you make the resolution smaller than it fits to the page.

- **Security Testing**

- When writing my bank details with a mistake every time showed me that the system doesn't block me but every time I received a message that one of the details is wrong.
- When adding writing signs as %@? to my personal details in the blank fields as for I.D or full name or phone number, the system is sending me a notification that I need to write a proper details and can't be taken to the next level.
- When writing personal details.
- On the travel Insurance page, when I wrote my personal details and about medical history, I copy and paste the page and on the new page I started from the main menu and not from the point where I wrote my personal details.
- The site use SSL for security (HTTPS).

- **Accessibility Testing**

- In every page that I went through on the website, I had the accessibility icon that showed me variated features for several disabilities.
- "Wobi" site is adjusted to the standard of the WCAG 2.1 in the level AA.
- The text in the site is in bold colour and very readable, there is featured to make it even more readable for people which have visual disability.
- By downloading voice over program, the page can be read for people which have hearing disability. For each operating system and browser there is different voice over program that connected, for example the program Jaws work well with chrome on windows.
- Possible to navigate in the site for people which have problem with using the mouse only by clicking VO+ right arrow or insert + arrow down for example.
- Most of the videos have subtitles but there are a few that don't like the video that introduce the travel insurance.

- **Internationalization & Localization**

- The website works also when you outside of Israel without changing your VPN. The website serves people who lives in Israel since all the services connected to services in Israel like the insurance companies but you can find translation of the website in big variety of different languages.

- **Survival Recovery Testing**

- When entering my personal data in a payment section, I disconnected the internet connection and when I connected it back, the page went back to the main tab before the current page I was.

- **Performance Testing**

- I could open several websites that were working in the background such as YouTube or downloaded programs while browsing on “Wobi” website and it responded as it should without latency and any other problem.
- The tests that were done on “Wobi” site went through 3 browsers: Chrome, Firefox and Edge.

- **Load Testing**

- In a load test through the website <https://pagespeed.web.dev> , I can see that the performance of “Wobi” is good and less than 3 seconds, LCP is 2.2 seconds.

Out of Scope:

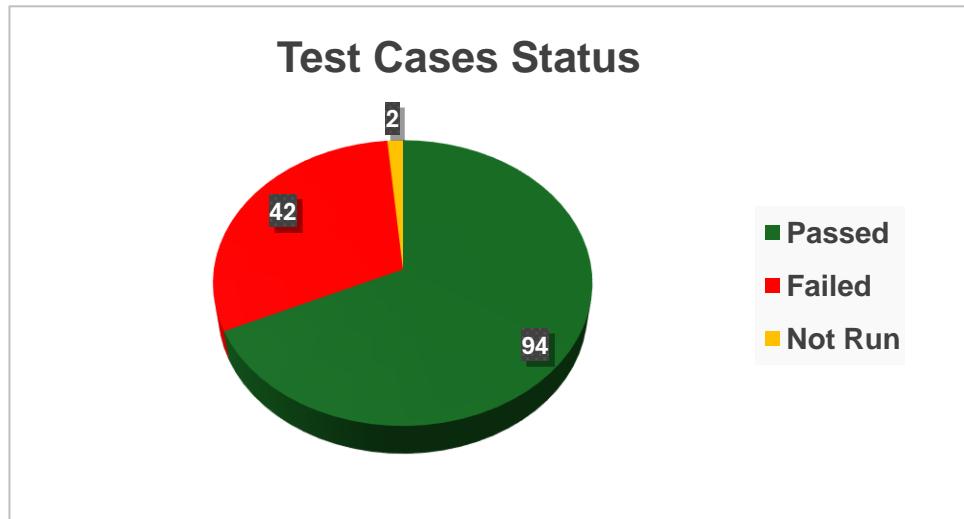

- Interfaces Testing were not done since I didn’t see that the website can interface with a camera or microphone in this website, however there are links that connected to the websites channels on Facebook or YouTube for example.
- Load Testing was not tested in a way of good performance when big number of users are using it since I don’t have the tool to measure it like JMeter.

Metrics

In the metrics we will check cases that were planned due to all the test that being made. The metrics will show cases that were executed; it will show also what passed and what was fail and everything will be demonstrated through graphs.

Test Case Status

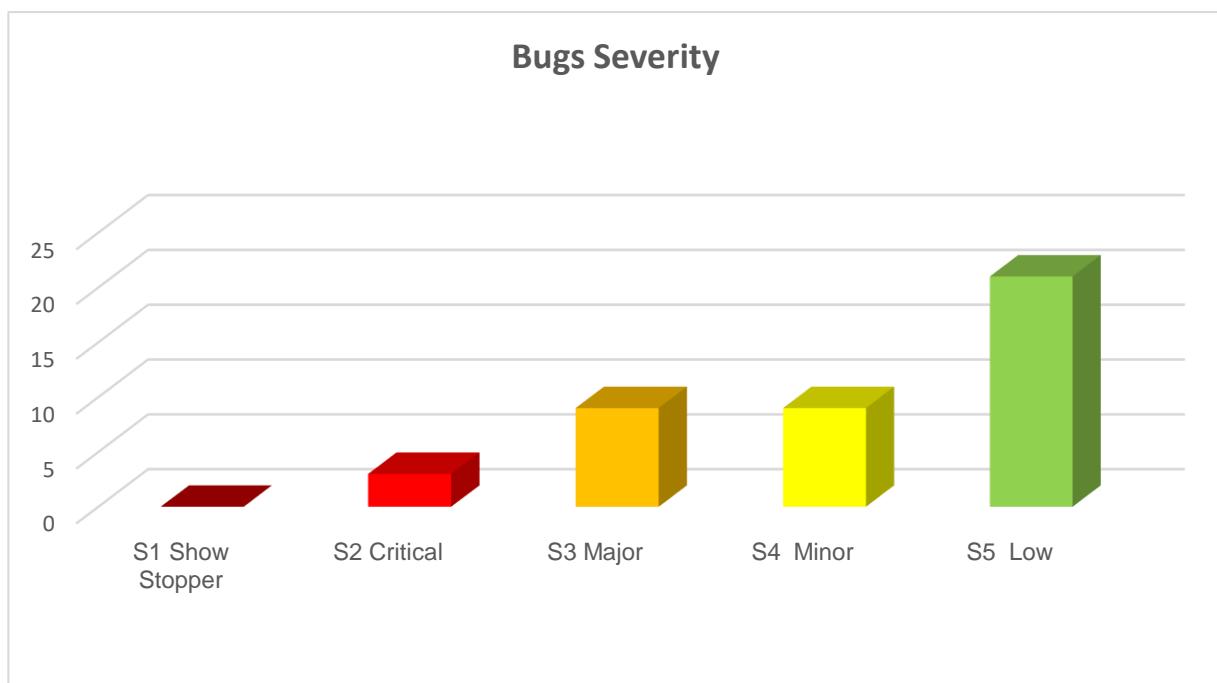

Pass	Failed	Not Run	Total
94	42	2	183

S4 – Minor	7	1	1	0	9
S5 – Low	7	4	10	0	21
Total	14	8	19	1	42

Defect Distribution - Module Wise

Recommendations

- I recommend that the bugs on the critical level should be fixed, as they refer to verifications details before submitting an order.
- I would recommend fixing the logo of the site position when you enter to the section of ביטוח דירה apartment insurance.
- A comment to do before releasing is in the section of Traveling Insurance, it's better to add a comment to write the name in Hebrew and in English as it shown in the passport so it can be match to the correct details
- I recommend publishing out the website since most of the bugs that were found were on the low level and were attached mostly to cosmetic features in the site.
- I recommend the programmer to check for the bugs #25, #26 since I couldn't describe it but on the DevTools it shows errors when you open the console, and you see all the Java Scripts and error #403.

Conclusion

The website still can be functioned even though there were bugs that were found through the testing.

Very important to mention that most of the bugs were on the level between Low to Major. If the exit criteria section will decide not to go out with this version of "Wobi" site for now, then changes must be done to fix everything that is needed to make the version out.

Exit Criteria

After making all the functional and nonfunctional tests of the website, I see that most of the bugs are cosmetics, therefore it's recommended:

- All tests that were done should be executed
- Specifying as much as possible the critical, major, and minor defects allowed before testing can be considered as complete.
- All performance must be shown by the metrics for all the tests to be considered acceptable before approving the release of the website. This could include response times, scalability, or other relevant performance indicators.

Bugs List

Wobi 1: Not all the insurance companies logos are being shown

Wobi 2: Not all the insurance options are being shown

Wobi 3: The words in the sentence going on top of each other.

Wobi 4: All companies logos are vertical

Attachments:

The screenshot shows a Microsoft Edge browser window with the URL [wobi.co.il/](https://www.wobi.co.il/). The page displays a service advertisement for '2744' with the text 'שירות לקוחות' and 'שירות לקוחות חדש' at the top. Below the ad, there is a large yellow box containing the sentence 'The words in the sentence going on top of each other'. At the bottom of the page, there is a red box containing the Hebrew text 'פגלאן ואשניזיאק' with a red arrow pointing from it towards the yellow box.

Severity:	S5- Low
Description	

Steps to Reproduce :

1. Enter through Microsoft Edge to URL <https://www.wobi.co.il/>
2. On the left side press on the tab **שירות לקוחות**
3. Scroll down after the logos list and see the sentence **הקליקו על הילינק**

Actual Result: The words in the first sentence are going on top the sentence below with the words **שאלות ותשובות**

Expected Result: The sentence will be clear without words going on top the others.

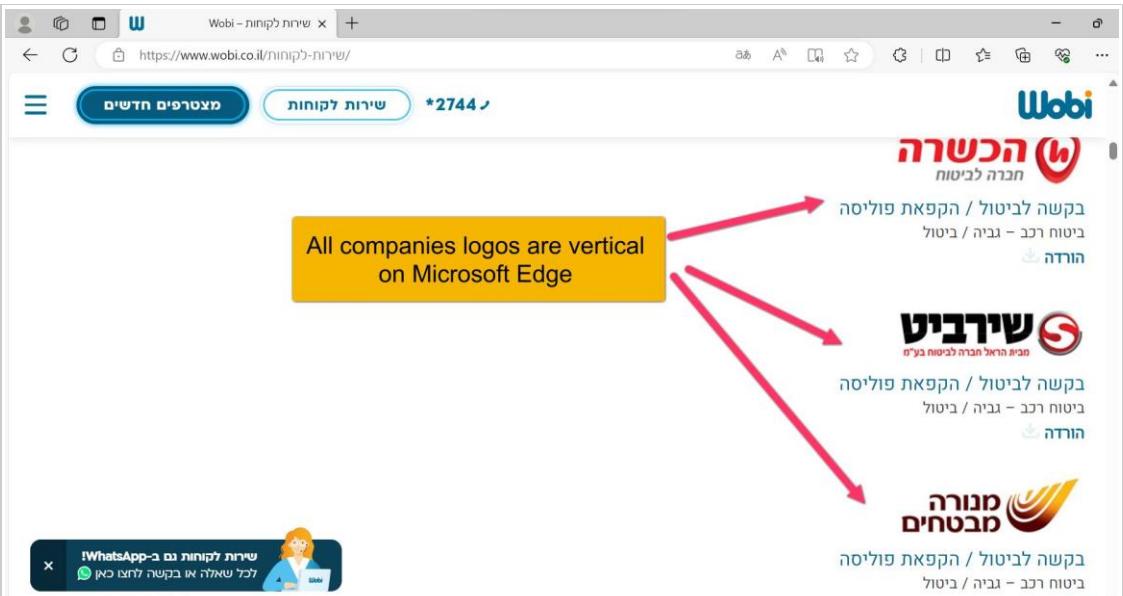

Comments

Comment by Tomer Darmon [15/Feb/24] The bug can be seen on the browser Microsoft Edge, pay attention that when you minimize the resolution you can see clearly the sentence.

[WOBI-4] All companies logos are vertical Created: 15/Feb/24 Updated: 15/Feb/24

The image contains two screenshots of a web browser displaying the travel.wobi.co.il website. Both screenshots show a search interface with a dropdown menu containing several street names. Red arrows point from a yellow banner at the top of each screenshot to the dropdown menu. The banner reads "Same street names are being shown for every different city". The dropdown menu lists the following street names: דרך בנימינה, דובדבי ברוך, דרך האחות, and דרך האלנות.

Severity:	S5- Low
-----------	---------

Description

Steps to Reproduce :

1. Enter URL <https://www.wobi.co.il/>
ביטוח נסיעות לטו"ל
2. Press the tab
3. Press on the next tab
4. On the new page chose dates , destination and press to continue.
5. Fill in your personal details like birth date, surname and family name, I.D. and gender then press continue
6. Fill in the options between צו/א regarding the health situation questions and then press to continue
7. Choose from the options in the new page if you would like to add some other insurance and approve before you press continue to the next new page
8. You will have a new window that will offer to add insurance for your suitcase, you can choose yes or not.
9. Choose your insurance suggestion that looks to you the most attractive.
10. Then fill in Your full name in English (you can type a name that is different of the Hebrew name) and fill your email and fully address which contains street name, number and city
- 11.. Same street names are being shown for every different city.

Actual Result: When you type a city name you will get names that do not exist in the city you choose

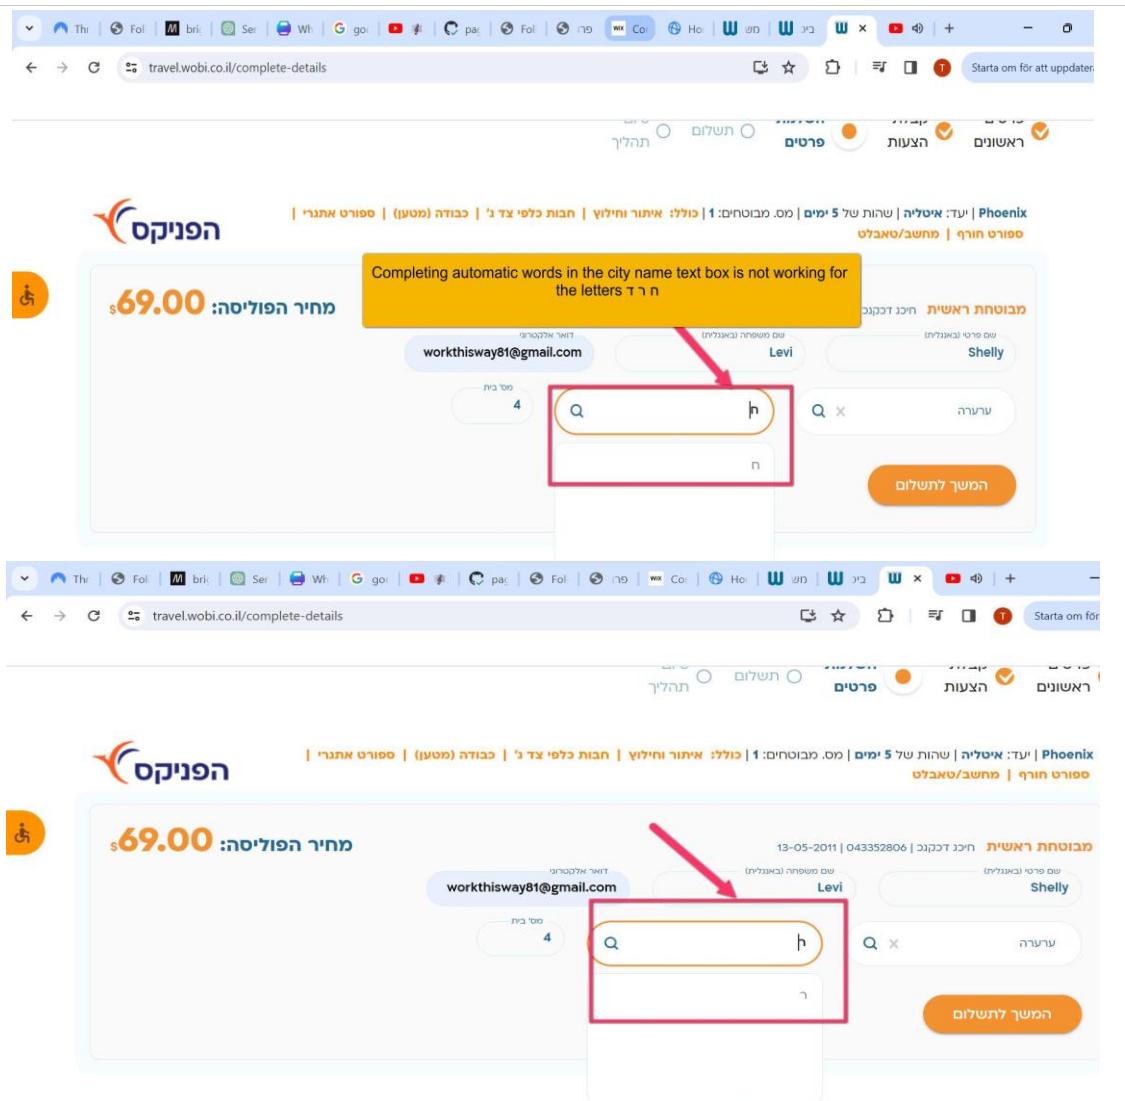

Expected Result: Having streets names that will match to the city you chose and not to see same streets names that will be shown in every city

[WOBI-14] Completing automatic words in the city name text box is not working for the letters ח ר כ

[WOBI-24] There are no subtitles in the youtube clips Created: 19/Mar/24 Updated: 19/Mar/24

Status:	To Do
Project:	Wobi

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	Browser : Chrome Version 121.0.6167.140 Firefox Version 122.0.1 Microsoft Edge Version 121.0.2277.106		

Attachments:

The screenshot shows a YouTube channel page for 'Wobi'. At the top, a yellow callout box contains the text: 'There are videos from 2012 & 2014 don't have subtitles'. Below the callout, there are two main video thumbnails. The first thumbnail is for a video titled 'Wobi TV 2014' with a duration of 0:21. The second thumbnail is for a video titled 'Wobi TV 2012' with a duration of 0:22. Both thumbnails have a 'Play all' button to their right. To the left of the thumbnails, there is a sidebar with links to 'Home', 'Videos', 'Shorts', 'Playlists', and 'Community'. Below the sidebar, there are two more video thumbnails: one for 'Tulum' (0:21) and another for 'Wobi Coil' (3.5K views, 9 years ago). To the right of the thumbnails, there are several other video thumbnails with titles like 'Wobi 2014 - ביטוח רכב', 'Wobi 2014 - מושווים וקונים ביטוח', 'Wobi 2014 - רכב סרטון החתונה', 'Wobi 2014 - רכב עוזים ב...', and 'Wobi 2014 - 2014 - ביטוח רכב עוזים ב...'. The bottom right corner of the screenshot shows the 'Wobi' logo.

There are no subtitles in the video clips

Severity: S3-Major

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Scroll down the page until you reach to the youtube icon
3. Press on the youtube icon and go to the clips which are under the year 2014 and 2012
4. Watch the clips and see there are no subtitles

Actual Result: When you watch the clips from 2014 and 2012 there are no subtitles

Expected Result: You would expect that there will be subtitles in all the clips for the people which have hearing disability

[WOBI-25] An error in several Java Scripts and 403 error Created: 21/Mar/24 Updated: 21/Mar/24

Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	Browser : Chrome Version 121.0.6167.140 Firefox Version 122.0.1 Microsoft Edge Version 121.0.2277.106		

Attachments:

Severity: S4- Minor

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Scroll down to the tab "כתבות נוספת" under the title "פנסיה"
3. Scroll down to the eighth title and press on it
4. Scroll down to the bullet point "קדין כספי תגמולים לעומת פדיאן כספי פיצויים"
5. Pay attention to the second sentence where it says "כספי תגמולים"

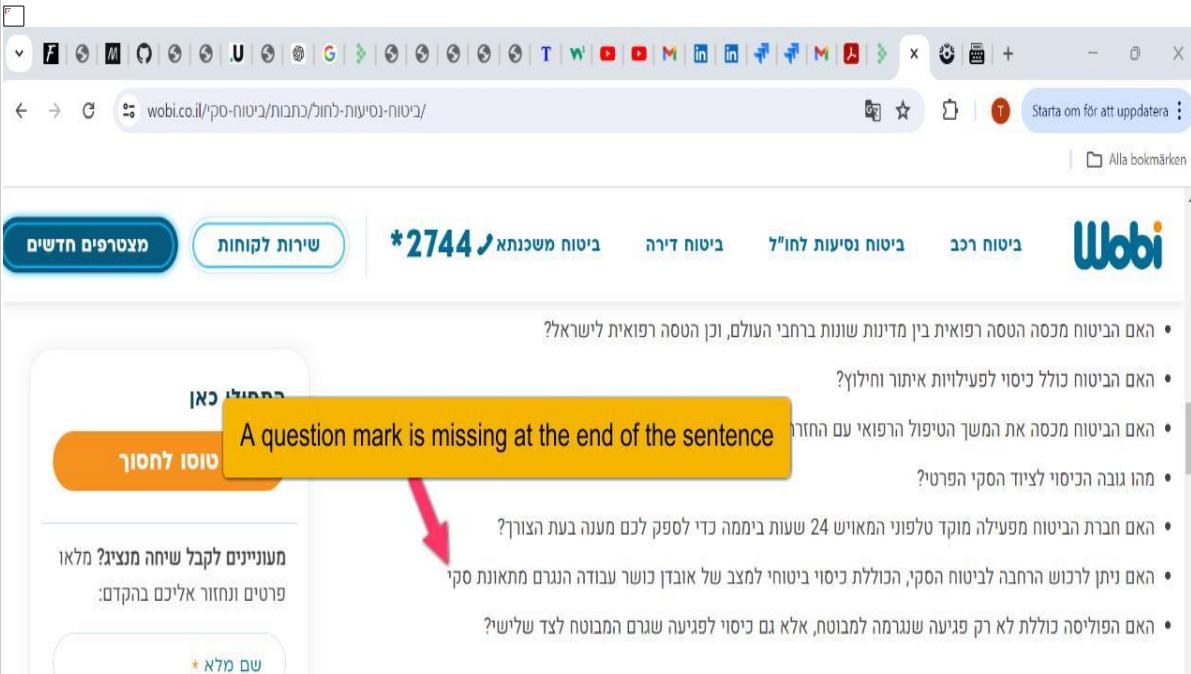

Actual Result: There is no space in between the words "כספי תגמולים"

Expected Result: There will be a space between the two words like that : "כספי תגמולים"

[WOBI-36] האם ניתן לרכוש הרחבה לביטוח הסקן, " "הכללת CISI בפיתוח למצב של אובדן כושר עבודה הנגרם ממתאונת סקי" Created: 20/Jul/24 Updated: 20/Jul/24

Status:	To Do
Project:	Wobi

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	Browser : Chrome Version 121.0.6167.140 Firefox Version 122.0.1 Microsoft Edge Version 121.0.2277.106		

Attachments: 

A screenshot of a web browser displaying a Wobi website. The page shows a search bar with the URL 'wobi.co.il/' and various navigation links. A yellow callout box highlights a sentence: 'A question mark is missing at the end of the sentence'. A red arrow points from this callout to the twelfth bullet point in a list on the right side of the page. The bullet points discuss various aspects of the insurance product.

Severity:	S5- Low
-----------	---------

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Scroll down the page and press "ביטוח נסיעות לחו"ל" under the title סקי
3. Scroll down till you reach the title "כיצד בוחרים ביטוח סקי"
4. Scroll down to the twelfth bulletpoint before the end of the paragraph

Actual Result : The sentence is actually a question that doesn't end with a question mark

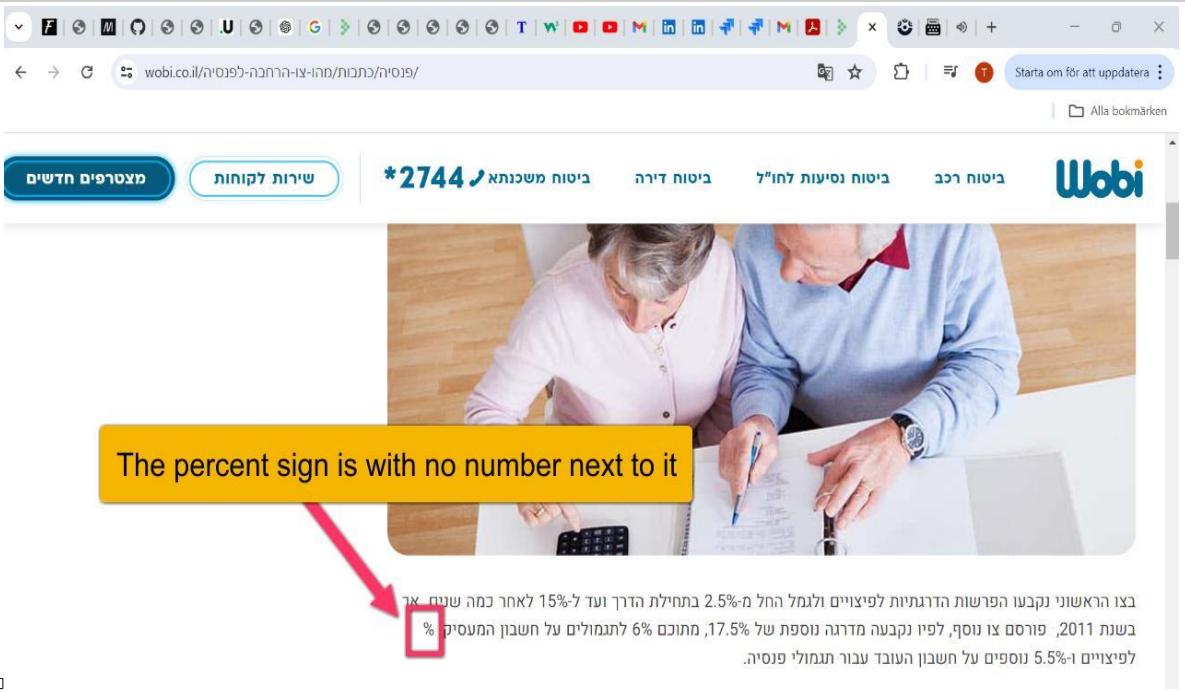

Expected Result: I would expect that after the word "סקי" there will be a question mark

[WOBI-37] There is no number next to the percent sign in the title "מהו צו הרחבה לפנסיה" under the photo
 Created: 20/Jul/24 Updated: 20/Jul/24

The percent sign is with no number next to it

בצז'ה הראשוני נקבעו הפרשות הדרגות לפוציימ ולבמ' החל מ-2.5% בתחלת הדרכ' ועד ל-15% לאחר כמה שנים. אך בשנת 2011, פורסם צו נוסף, לפיו נקבעה מדרגה נוספת של 17.5%, מתוכם 6% לתגמולים על חישוב המטען % לפוציימ ו-5.5% נוספים על חישוב העובד עבור תגמול פנסיה.

Severity:	S4- Minor
-----------	-----------

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Scroll down the page to the bottom and press on "כתבות" under the title "פנסיה"
3. Scroll down in the new page and press the sixth title "מהו צו הרחבה לפנסיה"
4. Look at the paragraph under the photo, in the second line
5. Pay attention to the last word and the percent sign which comes after it

Actual Result: The line ends with a percent mark but without a number referred to it after the word "המעסיק"

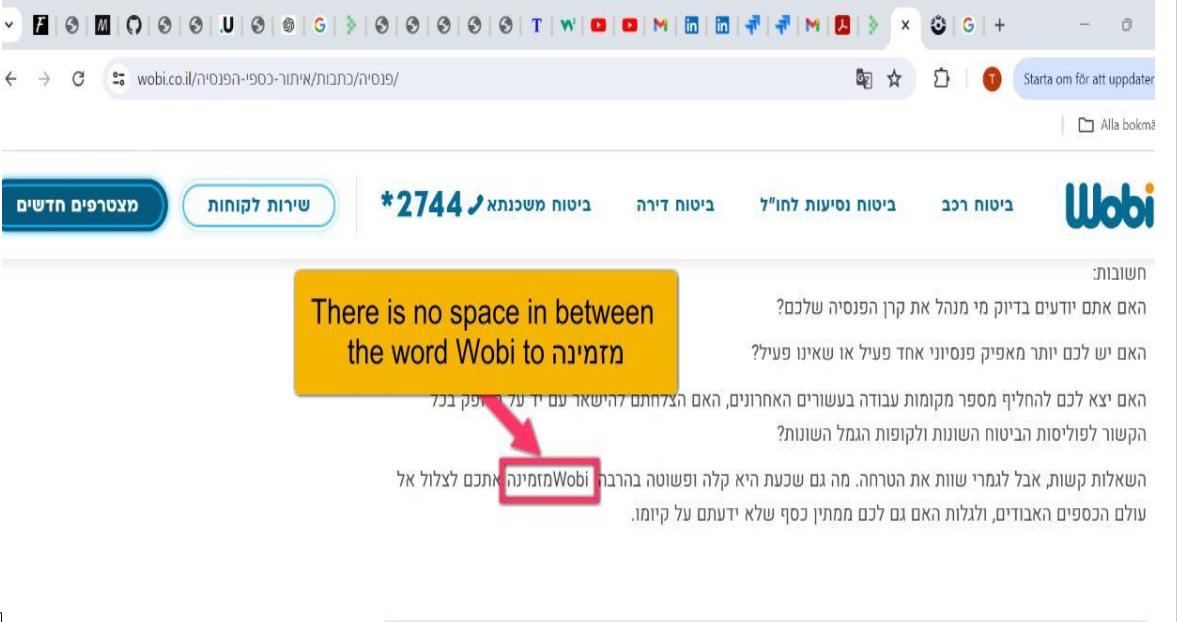

Expected Result: I would expect that next to the percent mark I will have a number

[WOBI-38] There is no space in between the words "Wobi" under the "פנסיה" "פנסיה מזמין"

Severity:	S3-Major

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Choose the insurance name “**ביטוח רכב**”
3. Press on the tab “**מكيف+חובה**”
4. Choose the date that you want to start the car insurance and press on the tab “**המשך לפרט**”
5. Press on the tab “**אין לי מספר רישוי**”
6. Press on the + tab and right in the text box the car brand **McLaran**

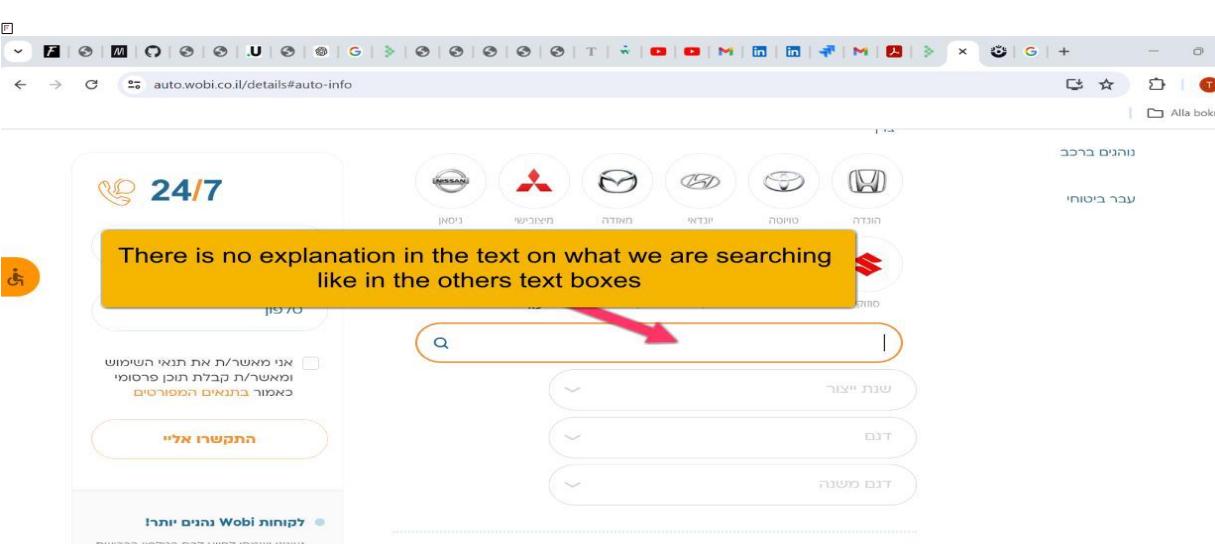

Actual Result: The site can't find the car brand in the engine source

Expected Result: I would expect to find the car brand - McLaren when I type it and the other cars brands would be display in the search engine

[WOBI-42] There is no information in the search box on what we suppose to look for while in the others search boxes it's mentioned Created: 22/Jul/24 Updated: 22/Jul/24

Status:	To Do
Project:	Wobi

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned

Attachments :	
Severity:	S3-Major

Description

Steps to Reproduce :

1. Open URL <https://www.wobi.co.il/>
2. Choose the insurance "ביטוח רכב"
3. Press on the tab "מקיף + חובה"
4. Choose the insurance date and then press the tab "המשך לפרט הרכב"
5. Press the tab "אין לי מספר רישוי"
6. In the new page press on the + icon

Actual Result: No description written inside the search text box to mention what we suppose to search

Expected Result: I would expect that there will be information of what is written inside the text box like in the others search field
